

Margaret Henderson, Ph.D

mmhender@cmu.edu

EDUCATION

- 2021 – present **Postdoctoral Research Associate**
Neuroscience Institute
Carnegie Mellon University, Pittsburgh, PA
Supervisors: Dr. Leila Wehbe and Dr. Michael Tarr
- 2015 – 2021 **Ph.D in Neurosciences with a Specialization in Computational Neurosciences**
University of California, San Diego, La Jolla, CA
Supervisor: Dr. John Serences
- 2011 – 2015 **B.S. in Biological Sciences**
Concentration in Neurobiology and Behavior
Cornell University, College of Agriculture and Life Sciences, Ithaca, NY
Summa Cum Laude with Distinction in Research

PUBLICATIONS & PRE-PRINTS

- Henderson, M.M.**, Tarr, M.J., & Wehbe, L. (2023). A texture statistics encoding model reveals hierarchical feature selectivity across human visual cortex. *Journal of Neuroscience*. <https://doi.org/10.1523/JNEUROSCI.1822-22.2023>
- Henderson, M.M.**, Tarr, M.J., & Wehbe, L. (2023). Low-level tuning biases in higher visual cortex reflect the semantic informativeness of visual features. *Journal of Vision*. <https://doi.org/10.1167/jov.23.4.8>

SELECTED PRESENTATIONS

Henderson, M.M., Tarr, M.J., & Wehbe, L. (2022). Informative associations between feature, spatial, and category selectivity in human visual cortex. Poster at Conference on Cognitive Computational Neuroscience, San Francisco, CA. <https://doi.org/10.32470/CCN.2022.1043-0>

Luo, A., Wehbe, L., Tarr, M.J., & **Henderson, M.M.** (2022). The Neural Representation of Real-World Object Size in Natural Images. Poster at Conference on Cognitive Computational Neuroscience, San Francisco, CA. <https://doi.org/10.32470/CCN.2022.1136-0>

Henderson, M.M., Tarr, M.J., & Wehbe, L. (2022). Interpretable mid-level encoding models of human visual cortex reveal associations between feature and semantic tuning for natural scene images. Poster at Vision Sciences Society meeting, St. Pete Beach, FL.

Henderson, M.M., & Serences, J.T. (2020). Anisotropic representation of orientation by convolutional neural networks. Talk at Vision Sciences Society meeting, held virtually.
<https://doi.org/10.1167/jov.20.11.224>

Henderson, M.M., Rademaker, R.L., & Serences, J.T. (2019). Complementary strategies for encoding information in working memory. Nanosymposium talk at Society for Neuroscience meeting, Chicago, IL.

Henderson, M.M. & Serences, J.T. (2019). Orientation representations in convolutional neural networks are more discriminable around the cardinal axes. Poster at Conference on Cognitive Computational Neuroscience, Berlin, Germany. <https://doi.org/10.32470/CCN.2019.1122-0>

Henderson, M.M., Rademaker, R.L., & Serences, J.T. (2019). Complementary visual and motor-based strategies for encoding information in working memory. Talk at Vision Sciences Society meeting, St. Pete Beach, FL. <https://doi.org/10.1167/19.10.91>

Henderson, M.M., Serences, J.T. (2017). Occipital and parietal cortex encode representations of match between a viewed and sought object during visual target search. Poster at Vision Sciences Society meeting, St. Pete Beach, FL. <https://doi.org/10.1167/17.10.1136>

Henderson, M.M., Vo, V.A., Chunharas, C., Sprague, T.C., & Serences, J.T. (2016). Reconstructing 3D stimuli using BOLD activation patterns recovers hierarchical depth processing in human visual and parietal cortex. Poster at Vision Sciences Society meeting, St. Pete Beach, FL.
<https://doi.org/10.1167/16.12.298>

Henderson, M.M., Gardner, J., & Raguso, R.A. (2015). Determining the optimal relative humidity conditions for release of the pest control agent *Trichogramma ostrinae*. Poster at Cornell Biology Honors Program Final Symposium, Ithaca, NY.

AWARDS AND HONORS

National Eye Institute Early Career Scientist Travel Grant, Vision Sciences Society (2023)
Distinguished Postdoctoral Fellowship from CMU Neuroscience Institute (2021-2023)
NIMH Predoctoral Fellowship in Cognitive Neuroscience, Institute for Neural Computation (2018-2019)
NSF GRFP honorable mention (2016)
Cornell University Academic Excellence Award (2015)
Cornell Hatch Supplement Grant (2012)
Alpha Xi Delta Slaymaker-Kinsey Award for Academic Achievement (2012)

TEACHING & MENTORSHIP

Guest Lecturer – Research Methods in Psychology, Carnegie Mellon (Spring 2023)

Gave a guest lecture entitled “Machine Learning for Cognitive Neuroscience and Psychology” in a graduate-level course on Research Methods, taught by Professor Laurie Heller. Covered basic approaches for the use of machine learning in psychology and neuroscience research, with emphasis on linear decoding methods applied to human fMRI data.

Mentoring/Supervising students, Carnegie Mellon (2021 - ongoing).

Supervising undergraduate students in collection of online behavioral data, image dataset labeling, computational analysis of neural data.

Co-supervised the Honors Thesis project of a student in CMU Psychology Department (Omisa Jinsi), focused on neural network modeling. Weekly meetings including hands-on supervision. Student was awarded a competitive prize for her work.

Mentees include Owen Hershey, Gaurika Sawhney, Omisa Jinsi.

Teaching assistant for Data Analysis in MATLAB, UCSD (2016)

Teaching assistant for graduate level course taught by John Serences. Reviewed student code & algorithmic solutions to weekly problem sets on advanced topics in data analysis, such as bootstrapping & permutation statistics, time-frequency analysis, pattern classification, and nonlinear curve & surface fitting.

Mentoring/Supervising students, UCSD (2016 – 2021).

Trained undergraduate students to collect behavioral, eye-tracking, and EEG data for ongoing projects, as well as basic programming and data analysis skills. Hold journal-club style meetings to discuss relevant papers and involve students in the research process. Supervised the Honors Thesis project of one student.

Mentees include: Kelvin Lam (Honors Program; went on to a PhD program at UC Santa Barbara), Yonghoon Chun (received a Psychology Department Undergraduate Research Fellowship; currently a PhD student at Dartmouth), Vanessa Cancio, Ben Carfano, Shruti Nishith, Julie Eitzen.

Project Advisor, UCSD Neurosciences Graduate Program Bootcamp (2018).

Led a week-long project for incoming Ph.D. students, in which they collected fMRI data and carried out a multivariate encoding model analysis in MATLAB. Presented lectures covering the basics of fMRI physics, experimental design, and analysis, guided students through data analysis and presentation of results.

Study group leader for Biology Scholars Program, Cornell University (2014)

Led weekly study groups for students in the Cornell Biology Scholars Program, an initiative aimed at improving the experience of under-represented students in biology. Prepared review lectures, hands-on educational activities, quizzes, exam prep materials.

SERVICE & OTHER ACTIVITIES

Organizing Carnegie Mellon brAln Seminars (2021 – ongoing).

Co-organized a multi-university weekly seminar series on topics at the intersection of neuroscience and artificial intelligence. Responsibilities included selecting and inviting speakers, hosting and introducing presentations.

Career Development Committee, UCSD Neurosciences Graduate Program (2017–2020).

Facilitate career-building opportunities for graduate students, including networking workshops and Q&A panels with speakers from academic and non-academic career paths.

Paths to PhDs Panelist, UCSD Psychology Department (2019).

Served as a panelist at event for psychology undergraduates, answered questions about graduate school applications, gave advice for choosing programs and advisors.

Neurosciences Seminar Series Committee, UCSD Neurosciences Graduate Program (2017–2018)

Organize weekly Neuroscience Seminar Series – includes selecting list of invited speakers (28/year), inviting speakers, arranging travel, assigning student hosts.

OTHER ACADEMIC TRAINING

Computational Neuroscience: Vision, Cold Spring Harbor Laboratory summer course (2018).

PROFESSIONAL ACTIVITIES

Academic Memberships:

Vision Sciences Society (2016–present), Society for Neuroscience (2015–2019, 2023)

Ad-hoc reviewer:

Conference on Cognitive Computational Neuroscience, eNeuro, Nature Neuroscience, Nature Communications Biology, Psychonomic Bulletin & Review, Journal of Experimental Psychology: General

OTHER RESEARCH EXPERIENCE

UC San Diego, La Jolla, CA (2016).

Rotation in the lab of Dr. Takaki Komiyama.

Collected GCaMP calcium imaging data from premotor cortex of awake, behaving mice during learning of a lever press task. Performed surgeries to implant cranial windows.

UC San Diego, La Jolla, CA (2016).

Rotation in the lab of Dr. Tatyana Sharpee.

Applied dimensionality reduction techniques (maximum noise entropy, maximally informative dimensions) to various data sets, including floral scent profiles and calcium imaging data.

Cornell University, Ithaca, NY (2012–2015).

Undergraduate thesis research, advised by Dr. Robert Raguso and Jeffrey Gardner.

Designed and carried out behavioral experiments investigating the use of the parasitic wasp species *Trichogramma ostrinae* as a biological pest control agent, and influence of environmental conditions such as humidity on parasitism efficacy.

Awarded an internal Cornell grant to fund this project.

Cold Spring Harbor Laboratory, Cold Spring Harbor, NY (2014).

Undergraduate summer research program, advised by Dr. Partha Mitra.

Developing a graphical software interface in MATLAB to automate the placement of stereotactic tracer injections, for use in the Mouse Brain Architecture Project.

Uppsala University, Uppsala, Sweden (2013)

Research assistant for Dr. Magne Friberg.

Used GC/MS analysis to identify compounds present in floral and leaf emissions of the flower *Primula farinose*.
